

MINIBOND 540 PRO

Semi-Automated Laminating | Foiling | Sleeking

The Minibond 540 PRO is our latest semi-automated finishing solution for laminating and foiling digital print.

Incorporating many commercial features including gate feed (auto overlap), inline automatic sheet separation and pneumatically controlled large diameter chrome heating roller, this machine has been designed to gain maximum adhesion to digital print at speeds of up to 20 metres per minute.

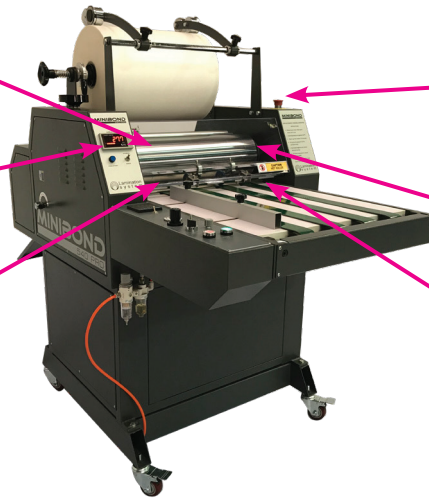

Complete with compressor, inline film slitter and foiling rewind module, the simple and robust design of the Minibond 540 PRO will ensure excellent results with minimal set up and ease of use for the operator.

In addition to the Minibond 380 and 520 machines, and with over 300 units sold Australia wide, the Minibond range is the industry's first choice in digital finishing.

High pneumatic pressure system

Digital overlap control

Semi-automated gate feed (auto overlap)

Removable safety roller cover and safety emergency stop

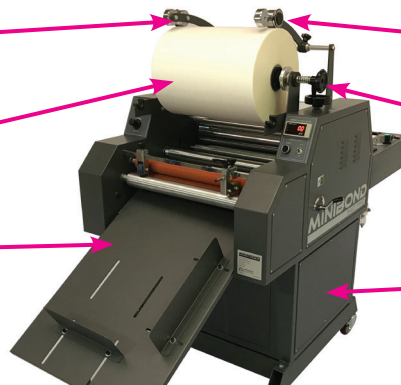

Commercial 160mm chrome heating roller

No sheet detection

Inline film slitter

Large diameter roll capability

High speed capacity up to 20 m/min

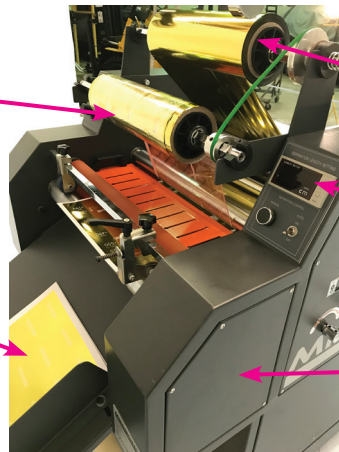

Film perforator

Accurate film tension control

Heavy duty cabinet and castors

Precision foiling and sleeaking rewind module

Built in catch tray

Fits 25mm, 58mm and 76mm core sizes

Digital control inline sheet separation

Compressor included for pneumatic control

Specifications

Max. sheet width	520mm X 800mm +
Laminating speed	0.5 > 20 m/min
Paper Thickness	120 - 350gsm
Film / Applications	BOPP / Foiling / Sleeking
Film Core Size	25mm / 58mm / 76mm
Chrome Roller Diameter	160mm
Roller Pressure	Pneumatic / compressor included
Power	AC 220V, 50/60 Hz, 15A (max)
Weight	275 kgs
Machine Dimensions	L 1420mm X W 970mm X H 1150mm
